

Bartosz Kulpa

Junior Front-End Developer

Summary

- I am a Frontend Developer with one year of experience, specialising in JavaScript, React.js, HTML, and CSS. I excel in designing responsive user interfaces, emphasising both aesthetics and efficiency. My skill set includes effective management of application state using Redux. Additionally, I am familiar with SQL and have experience working with databases, enabling me to handle data effectively. As a results-oriented programmer, I am prepared for further development and eager to tackle new challenges in the field of frontend development.

Hobby

I am fueled by a variety of passions that keep my mind sharp and my body in constant motion. Brazilian Jiu-Jitsu holds a special place in my heart as my greatest passion, seamlessly blending the artistry of martial arts with the excitement of strategic combat. My dedicated commitment to this discipline reached its pinnacle when I achieved the title of amateur vice-champion at the European Three Crowns tournament.
