Computer Games

Work History

2023-01 - present

Junior Front-End Developer

CryptoTradingHub, Remote

In my role as a Front-End Developer, I specialised in designing, developing, and optimising responsive web applications using a modern technology stack including JavaScript, React.js, and Redux. I leveraged HTML and CSS to create engaging and visually appealing user interfaces, ensuring compatibility across various browsers and devices.

2023-07 - present

Regular Software Implementation Specialist

UNISOFT Sp. z o. o., Szczecin

2020-03 - 2023-07

Junior Software Implementation Specialist

UNISOFT Sp. z o.o., Szczecin

In my role, I focused on developing and optimizing Oracle database systems, incorporating data analysis and automation using Python. I maintained and enhanced applications with Delphi, ensuring system integrity and performance. I managed both Windows and Linux servers, utilizing SSH for secure operations. My expertise contributed significantly to improving data management and supporting critical infrastructure.

2019-01 - 2020-02

Junior IT Administrator

DobryAdres.pl, Szczecin

In my role, I focused on designing and implementing user-friendly websites with a keen attention to detail, leveraging HTML and CSS for their development. I took charge of managing MySQL databases, prioritising secure and efficient data access. Server administration was also within my purview, utilising SSH for security and efficiency. A significant part of my responsibilities included SEO optimisation, aiming to boost web visibility and improve search rankings.
